4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.	Name of Attached Document Listing Required Information

**Response to Line 510 - Service Quality Standards and Consumer Protection Rules**

**Compliance - Voice and Broadband**

In establishing this certification in its *2005 ETC Order*,<sup>1</sup> the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”<sup>2</sup> The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement and that the sufficiency of other commitments would be considered on a case-by-case basis. In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”<sup>3</sup>

Miller Telephone Company (“Company”) hereby certifies that it follows applicable service quality standards and consumer protection rules. The Company follows the service quality and consumer protection provisions under state law. These provisions include, but are not limited to, the following: (1) filing a Local Exchange Tariff with the Missouri Public Service Commission which discloses rates, terms and conditions of service to customers; (2) follows the state consumer protection provisions relating to Customer Services as identified in section 4 CSR 240-28.060 of the Missouri Code of State Regulations, follows the provisions for Quality of Service as identified in section 4 CSR 240-28.060 of the Missouri Code of State Regulations, follows the Service Objectives as identified in section 4 CSR 240-28.060 of the Missouri Code of State Regulations, follows the customer Inquiry procedure as identified in 4 CSR 240-28.060 of the Missouri Code of State Regulations, and follows the Dispute standards as identified in 4

CSR 240-28.060 of the Missouri Code of State Regulations; (3) compliance with truth-in-billing requirements; and (4) compliance with Federal CPNI rules, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy.

The Company is subject to consumer protection obligations for broadband services under federal law. These obligations include, but are not limited to, the following: public disclosure of accurate information regarding network management practices, performance, and commercial terms of broadband internet access services; as a means of providing sufficient information for consumers to make informed choices regarding use of such services, and for content, application, service and device providers to develop, market, and maintain internet offerings as specified in F.C.C. 47 C.F.R. §8.3. The Company furthermore will comply with all requirements set forth in the 2015 Open Internet Order.

**Response to Line 610 - Ability to Function in Emergency Situations  
for Voice and Broadband Services**

Miller Telephone Company (“Company”) hereby certifies that it is able to function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part § 54, Subpart C, 54.202(a)(2)<sup>1</sup> and the Missouri Code of State Regulations. The Company’s network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can change call routing translations as needed to reroute traffic around damaged facilities.

Changing call routing translations will also allow the Company to manage traffic spikes throughout its network, as emergency situations require. In addition, the Company has redundancy for connectivity purposes via additional routes and electronic equipment for both voice and broadband services.

Specifically, each central office building is supplied with standby generators and battery reserve that enable the central office to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic. The Company has battery backup at all office locations and in its electronic equipment sites and has a maintenance program in place. The company’s standby generators and battery back-up support both voice and broadband network equipment should an emergency situation occur. The company complies with the FCC’s backup power requirements.

---

<sup>1</sup> Section 54.202(a)(2) requires ETCs that are designated by the Commission to “demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back- up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations.”
